- _____ guitar, ukulele, or other portable musical instrument
- _____ ciniba for coups (returning campers)
- _____ OTK tie and pin (returning Old Timers)
- _____ knitting needles, crochet hook, yarn, friendship bracelet string

Packing Notes on Trip Clothes & Gear

At Songadeewin, each camper goes on a trip each month she is at camp. Below are details to help you understand what your child needs to be comfortable on trip. We recommend researching online and/or bringing this packing list to a local outdoor goods store including, L.L.Bean, Lands End, Campmor, REI, or EMS. Please give us a call with any questions!

Rain Gear

Rain jacket & pants must be water repellent, not simply water resistant. Example: [L.L. Bean's Trail Model Jacket](#) or rain pants.

Polyester Fleece Top or Wool Sweater

A good, old fashioned wool sweater works fine here and there is also a lot of polyester fleece available too. This item needs to keep your child dry and warm when it is wet out. The key is that it be 100% polyester! Please, no cotton. Example: [L.L. Bean Mountain Classic Fleece Jacket](#)

Non-Cotton, long sleeved top

This is an important layer which wicks away moisture while keeping you warm. It also works great under a PFD on a day when the weather is changing a lot, or on a hiking trip when it's buggy. This is sometimes sold as a Long Underwear or baselayer top. Example: [L.L.Bean Wicked Warm Top Midweight](#)

Polyester Fleece Pants

Like sweatpants, but all polyester (NO cotton). These fleece pants are lightweight and easy to get on and off for around the campsite when evening has settled. They are warm even if they get damp. Example: [L.L.Bean Mountain Fleece Leggings](#)

Wet Loaders

Wet Loaders are sturdy, lace-up shoes that we wear to protect our feet while canoeing. They can get wet and remain comfortable for walking. They must be lace-up sneakers so that they will not get sucked off in mud. Wet loaders **cannot** be tevas, chacos, water shoes, or sandals. Old sneakers that still fit comfortably work great.

Hiking Boots

You may choose a style that you like and which is comfortable and sturdy, with ankle support. It is essential to break your hiking boots in before camp! Visit your local outdoor store to get fitted and practice wearing them around before camp starts.

Sleeping Bag & Sleeping Pad

Your sleeping bag should be made of a synthetic material, lightweight, and packable in a stuff sack. A bag rated to 40 degrees is sufficient for most campers. For campers in our oldest grove, Willoughby, we recommend a sleeping bag rated to 20 degrees. For a sleeping pad, you may choose an inflatable pad that rolls into a sack or a foldable/rollable foam pad.
